

\$499 + GST · FULLY ONLINE · UP TO 3 QUOTES

Before you sign a building contract, know **exactly what you're paying for.**

BuildHawk reviews your builder quotes against your plans and specifications, lines them up apples for apples, and flags the scope gaps, under-allowances and variation risks that cost homeowners tens of thousands after the contract is signed.

Three quotes, three different numbers, and no way to compare them.

- One builder includes site costs. Another does not.
- One allows realistic PC sums. Another under-allows.
- One excludes permits, engineering or service connections.
- The cheapest quote can recover the gap through variations later.

What your review covers

01

Apples for apples comparison

We align every quote so you can see exactly where they differ and what each one has, or has not, included.

02

Risk assessment

We flag high variation-risk items, unrealistic allowances, missing documentation and the areas most likely to cause disputes.

03

Budget reality check

As builders ourselves, an honest opinion on whether the quote is realistic and whether you are likely to face significant extras.

04

Questions to ask before signing

Practical builder questions on rock excavation, engineering changes, electrical upgrades and service connections.

\$499 + GST

One flat fee, whether you have one quote or three.

- 1 Pay online
- 2 Upload your quotes, plans and specifications
- 3 We review and reconcile
- 4 Report and readout within 5 business days

Independent, and on your side.

We don't criticise your builder and we won't tell you who to choose. As builders ourselves, we tell you how the numbers stack up so you can decide with confidence.

Spend \$499 before you spend \$800,000.
